

NEWS FROM #UCOME

Dear readers,

Last month during 14 and 17 of February, #UcomE had their Learning, teaching and training activity in Athens. IASIS hosted the partners wonderfully

During the training, trainers from the 4 organisations showed and taught a workshop each, which will be part of the next Intellectual output, the Toolkit in community engagement for youth organisations and youth workers. All the workshops included in the toolkit have the intention to empower youth, make youth proactive, and to create curiosity and interest in social engagement and youth participation processes.

The 4 workshops that we tested were; Making a public and creative presentation (By ZID), how to succeed on networking (by Logopyscom), connecting with your type of leadership (By IASIS) and podcasting as a communication tool (By CIP)

Local training coming up

During the months of March and April, all partners except IASIS, will conduct local training in the city they are situated in, where the workshops of the toolkit and the digital platform will be tested with youth workers, trainers, and educators working on the youth and social organisation. Videos for public awareness of social engagement and its importance, especially for youth, will be also included during the training and disseminated afterward.

Next deliveries

The outcomes that will be delivered during the next months will be the following:

1. **The toolkit in community engagement** for youth organisations is composed of workshops and digital tools. It will help youth workers and youth organisations to conduct a real project initiative on community engagement

2. **The online project management platform** whose main goal will be to assist the user, youth organisation, or youth workers, to develop and manage their own social project/ action plan

We will keep you posted, see you soon!
